

IB Math HL 1

Summer Assignment 2018

This assignment is due in its entirety the first day of class.

The purpose of this assignment is to provide you with an overview of the prerequisite skills that will be essential to your success in HL Math. You may refer to your notes from previous math classes to help you complete the assignment. Please take the time to show all of your work neatly in a spiral notebook. Additionally, each graph should be on its own coordinate plane, where needed.

Students are responsible for completing Chapter 14: Prior Learning. Students should be familiar with all vocabulary terms and definitions. IB likes to use different terminology for topics; therefore it is imperative to understand the language. All activities should be completed in a spiral notebook. There are four different topics that will be tested upon return to school. Textbooks may be signed out from Mrs. Bates prior to the end of the school year.
