

SL Summer Work 2020-2021 SY

This might look like a lot, but it should not take a very long time at all. Please do not skip this work because we will pick up with this once we come back to school.

- 1) Read p 301-303, take notes, complete Exercise 6H (1-3)
- 2) Read p 305-307, take notes, complete Exercise 6I (1, 2, 4)
- 3) Read p 308-309, take notes, complete Exercise 6J all
- 4) Chapter Review p 311-315 ** Complete as many problems as you think you need to do here, but the more the better in most cases. It is okay to skip the super easy ones, and struggle on the Exam Style ones.
- 5) Read p 318-319 and complete the Before You Start questions.
- 6) Read section 7.1 and take notes (p 320-323), complete 7A all.
- 7) The seniors recommended that you go through your notes from this year and practice problems over the summer in between junior and senior year because many of them forgot topics from the beginning. It is good to make a list of topics so that next year it is easier to find your notes. I will also post some challenge problems that are in the IB format so you can get some practice.
